The School Context

Malowali Higher Secondary School is located in the North West Jorhat block of the Jorhat district of Assam. The school is co-educational and situated in a rural area. The school is managed by the Department of Education

Challenges Faced due to School Closure

The school faced a challenge of mental health issues among students during the pandemic as children were restricted to their homes only and could not engage themselves in any physical activity outside their homes. School dropouts were rising as a result of academic struggle, lack of support, and poverty. Due to school closure, cases of early marriage or child marriage increased. Challenges were faced problems due to lack of infrastructure- facility. Teachers and principals also faced the issue of a lack of awareness of parents both at home and school.

Innovative Leadership Practices for Mitigating Learning Gaps

School set up a career guidance cell. Various job-oriented subjects were introduced. School also set up a computer lab. We have organized some student-related events. The school also boasts a legal literacy cell which makes the students aware of their legal rights. Another important project was the induction training program for teachers, which enhances their technical skills. To maintain the continuity in the field of education, the school head adopted a village by naming as *Amar Village* to looking in to holistic development of education.

Webinar on Mental Health & Wellness

The school has left no stone unturned in training the teachers and giving them the right platform to show and promote their skills. The teachers have taken an active part in the NISTHA (National Initiative for School Heads and Teachers Holistic Advancement) program. The teachers have also taken part in an induction training program to gain proficiency in computer education. With the help of the community and parents/families, the school has adopted a village named "Sarucharai Khat". The school tried to create adult awareness among the villagers who are mostly related to the occupation of fishing rather than education. The school adopted this village to solve the problem of dropout students, and also provided dustbins for maintaining sanitation and cleanliness. The teachers gain proficiency in computer education through an induction training program. The use of Digital Classrooms learning became more fun which resulted in better board exam performances. In the years 2020 and 2021 H.S. board

exams recorded a 100% pass percentage.

Collaboration with Community and Parents to Ensure Student Learning

During the pandemic, school management organized numerous video conferences with the students to reinforce positivity within them and keep their studies on track. Teachers also conducted door-to-door classes for those who have no smartphone

Door-to-door classes during pandemic

Way Forward

Ensuring 100% maintenance of COVID-19 protocol during offline classes and conducting the physical meeting. Maintaining proper records of student data and updating on regular basis.
