#### **The School Context**

MPPS HW Adavidevulapally is located in Damaracherla block, district Nalgonda of Telangana. It is situated in a rural setting. This school is managed by the Local Authority.

#### **Challenges faced due to School Closure**

Students that belonged to families having low economic status were not able to watch online classes due to the unavailability of devices like phones and television. Some of the students also faced difficulty in studying because of the power shortage.

#### **Innovative Leadership Practices for mitigating learning gaps**

Since many of the children were not having mobile phones, groups were created of the children living close by., they were told to share the phones for online classes. Teachers

gave assignment both online and through printed worksheets. When the school reopened the school followed all the SOPs issued by the government from time to time.

#### **Collaboration with community and parents to ensure student learning**

The school conducted a meeting with parents and discussed with them the importance of taking care of the children and creating a positive environment at home in times of stress and cleaning the surroundings around their home.

## **Way Forward**

To make the school environment compatible with the Covid 19 situation, necessary norms would be followed in the school such as sanitizing the school, cleaning the surrounding of the school and checking the body temperature, wearing a mask would be mandatory, and maintaining physical distance.
