

+2 HIGH SCHOOL HANWARA

NAME OF THE SCHOOL HEAD -MD. SAMS PERWEJ

TYPE OF SCHOOL -GOVERNMENT(9-12)

TOTAL STUDENTS ENROLLED -799

SOCIO ECONOMIC CONTEXT -The level of education of the parents of students studying in the school are not good. Due to poor level of family education are also obstacles in the education of children. The parents are generally related with cultivation and labour work. Due to which children remain absent from school during farming days help their parents during farming time. The annual income of their parents are very poor. So they struggle with food related problems.

CONTEXT OF THE SCHOOL -There are totally 8 rooms in my school. In which one room is used for library, 1for laboratory 1for ICT lab and 1for vocational lab. In this way only four classes are left for the students to study in which the classes have to be conducted. Still we are running the school very well. Distance of my school from the block headquarter is approximately 15 km. My School located in a remote rural area. We receive very good support for our school from the society. School is green and clean.

SCHOOL VISION --+2High school hanwara is beacon for our community and the centre of an urban Villages. Allstudents will achieve personal success in their learning and become a responsible citizen. Our main goal is to ensure the holistic development of all students.

MISSION --+2 High school hanwara is a place of support and understanding. We strive to educate the children maintaining high academic standards. We seek to have parents and community actively involved in our students learning. As a school community we value a safe environment in which to teach and learn. Our diversity is our strength.

CHALLENGES FACED - Generally arranging classes is the biggest challenge of my school. Still continuously corresponding with the department in this regard. Hopefully the solution of this problem will be found soon.

-Parents are not involved regularly in PTM meeting.

-High official paper works.

-Economic condition off parents.

- SMC members donot fully support the school.

STRATEGY TAKEN TO DEVELOP THE SCHOOL -

-I adopted the path of Better communication between students and teachers.

-I made

the school environment safe and welcoming for students.

-Cooperation SMC members was also taken in the development of the school.

- Parent- teacher meeting also contributed a lot.

-Utilization of school resources by children.

- I gave the responsibilities to Bal sansad in different activities of my school.

INNOVATIVE PRACTICE IN THE SCHOOL -

-The games and imitation in students learning.

-To llay strong emphasis on the use of laboratory and projects in science education.

-Better use of ICT lab and smart class by students.

-Apply demonstration and lab method of teaching in science.

-Interaction based teaching.

- Engage in purposeful play.
- Promotes higher engagement and class attendance.
- Encourages creative thinking.

THE STRATEGIES FAILED OR GO SUCCESS -

I continued work hard and achieved success.

HOW FAR SUCCEEDS-

When you work hard success kisses your feet. I also kept trying and achieved success to a great extent.

MY FAILURES-In the beginning one has to work hard and there is a fear of failure. But if you working hard continuously then you will definitely get success.

VISUAL RESULTS -A educational environment was established in the school. The result of the school board examination in 2023 was almost 100%.

LESSON LEARNT FROM THE SURVEY-

A should never loss courage and keep trying to build a better school.
