

REPORT FOR THE 'SYNERGIZING LEADERSHIP ACROSS SCHOOL ECOSYSTEM' BY EMEA HSS KONDOTTY

The E.M.E.A Higher Secondary School, which has been operating for four decades under the Eranad Muslim Educational Association (EMEA), which has given wings to Malabar's educational dreams, is shining on the educational map of Kerala.

Matruvidyalaya, which has given the first letter to the generation, after 40 years since the letter yard of the school spread the shadow of knowledge on the educational map of this small village, this school is becoming the light tower of the society. Our school has given everything along with knowledge to this region which was backward in all fields such as Educational, social, economic and cultural. To address the backlog, the role played by the school is not small.

EMEA, established in 1983, has achieved many excellences at the national, state and district level and has made great marks at the state level.

Lack of quality education, facilities, guidance, economic disadvantage and gender discrimination mean that very few people from the backward classes have access to education.

Based on the school's mission and vision, systematic activities of the current children and the community, a case study is done to find out the problem through that.

Based on the initial study, planning and original research of the backward classes and finding its solution through several projects which are implemented today.

The school was able to enlighten tens of thousands of pupils and contribute them to society.

The main objectives of this organization are:

1. Promote quality learning and creativity among students and teachers.
2. Inculcate love of learning among students.
3. To make learners mentally, morally and physically fit to socially reform human society.
4. Train students to be creative and competitive to face the challenges of the new millennium.
5. To meet the backward educational needs of our region.
6. Physical and mental health of the student

Total children this academic year (2023-24) :1532

Total Teachers :47

Non- Teaching Staff :4

School Bus :6

Hi-Tech Classrooms :30

Store, Science Lab, I. T. lab, Kitchen, spacious ground, Volleyball court, badminton court, coffee shop, library, compound wall, entrance gate, Staff room, etc.

A differently abled friendly school, Ladies toilet, Seminar Hall, Stage, solar panel system, water purifiers, Green Protocol, Eco friendly school.

Strength

Management based on enthusiasm, foresight and sincerity, Active Parent Association, Alumni with Institutional Obstacles, Ex-Teacher Association, Service-minded neighbourhood Association, Various School Clubs, Various Community Clubs, Fraternal Institutions, etc.

Weakness

Geographical difficulties, Water scarcity, economic backwardness and backward classes.

Among the society 90% people are of minority classes and as a side effect of migration of parents to gulf countries in search of livelihood, due to lack of job they are forced to wage labour, education for social self-sufficiency. The school is currently located in the interior of the village.

Description of Community

Most of the students are Muslims, and scheduled caste and other backward communities. They experience the rules and regulations of their own communities.

Attitudes & Issues

The students have a mentality of going abroad for job seeking in the near future as they want to be financially stable.

Theory of Change

To solve the above-mentioned problems and to fulfil the aims and objectives we have taken action plans such as:

UNARV (AWAKENING)

Unarv (Awakening) is a project designed to uplift all students in the field of academics, non-academic and in the field of artistic services. Lack of comprehensive upliftment programs in schools and coaching of children with learning disabilities into separate groups leads to the formation of inferiority complex in children.

But the Unarv project has been able to change the backwardness of children with learning disabilities by giving them more consideration and encouragement than other children in school and by forming appropriate plans without them even knowing about it.

Unarv Activities

An exam was conducted in the school to find out the students with learning disabilities. In addition to it, a list of students was selected for the Unarv project.

WHAT WE NEED TO KNOW ABOUT LIFE, LEARNING & TECHNOLOGY IN CHILDREN

The main objective of this project is to inculcate social responsibility, human relations and love of nature for everyone in the society, especially children.

The world in which we study is constantly changing. Technologically great growth is happening all around. It is a very good change. There is a change in learning and teaching methods in each era. The change that is happening now is much bigger than what happened before. Technologies exist today to bring any source of knowledge in the world into our classrooms. Such techniques and tools should therefore be brought into the learning process. Thus, when modernization takes place in the field of education, there are some adverse changes.

Therefore, we should identify which are the methods of learning that are emphasized in modernity and assimilate what is good in it and reject what is not. It is the need of the hour to build resilience in the mind of a child like this. We should be able to understand and analyze these new strategies and choose the necessary ones to achieve the goal of becoming a true human being while using all the possibilities around him! Thus chosen, human relations, connection with nature and social responsibility should be fostered.

This mental growth should be complementary to cultural growth. New ideas will come through that. The generation of new ideas will lead the society forward. Teachers, children and parents should be careful about this. Realizing that the technological tools in front of us can be used for good, we must embrace only the good and reject the rest.

As a part of this, exercises under the heading that we should know technology...

ALONG WITH THE PEOPLE AROUND THE SCHOOL

Education is the process of changing the relationship between nature and man, the relationship between man and man, and the relationship between man and other beings in the way nature intended, and the true definition of education is to change man into man. Its journeys in search of war.

Children's discussions with people from different areas in the school's vicinity...

Event highlights:  

AMMAKKORUMMA PROJECT (A KISS FOR MOTHER)

Suicidal tendencies, drug addiction, depression, lack of interest in studies, examples of deviance in children go on. Apart from blaming the new age children, the accusers are not thinking about the new age home environment. If we look for the inner conflict that our children are experiencing, we will end up in the discomfort in the families. Parents' erratic lifestyle, responsibilities forgotten in the busyness of work, conflicts. Are children the reason for this? However, it should be remembered that all this affects the children themselves.

'*Ammakkorumma*' project to start changing the atmosphere at home.

Children should do this activity when they come back home on time. Through this the children can maintain their relationship with their parents.

PULARKALAM (THE MORNING)

'*Pularkalam*' comprehensive education scheme aimed at improving mental health and physical growth of students.

Training in yoga, meditation, aerobics, morning ride etc. is a part of the project.

The main objective is to give students confidence and motivation to undertake learning activities. Camps will be held from six to nine in the morning on 10 days in a month. Motivational classes and motivational videos will be part of this.

Activity link : [PULARKALAM](#)

ATTITUDE TOWARDS AGRICULTURE

The students are encouraged to be involved in agriculture in their daily life.

Activity link: [krishideepam](#)

E.M.E.A STUDENTS WITH BOOK DISCUSSION CAMPAIGN

Kondotty: E.M.E.A, the book discussion camp was started under the leadership of the School *Unarv* (Awakening) Unit. Headmaster P. T. Ismail Master inaugurated the program. Master presided over the revival to coordinator K. M. Ismail.

Various short stories which are marked in the public sphere of Malayali life were presented on the occasion of the inauguration.

A month ago, as part of the camp, the aim of the project was to select the book and give it to the students to discuss at the school level.

In the coming days, autobiography and biography genre books, children's favorite books like I Am Malala, I Am Nadia Murad, Mother Teresa, Greta Tune Berg, N.N. Books such as Pillai's '*Njan*' (Me), Nehru's Autobiography, Madhav Gadgil's Autobiography and Subhash Chandra Bose's Autobiography will also be discussed on different days. Shaju Parakal's collection of stories as the first book is Prakriti Yuva.

Inauguration News report : 

CHIRAK (WING) ONE DAY CAMP

Generally in schools, when an IAS officer comes, an induction program is organized with the selected top students of the school, but here, when the most disadvantaged group of children in the school were given an opportunity to meet with an IAS officer, the emotional satisfaction and response from the children was palpable.
