

Case Study

Name of the School : Barnakandi Colony H/S School, Dharmanagar

In a poor rural locality near the Indo-Bangla border in Dharmanagar is niched the Barnakandi H/S School. This school is the only hope for the three neighbouring colonies of the poor rural people. The schools standard is at par with any of the city's famed schools. Poverty is the only hurdle here. The Covid-19 situation of 2020 posed a serious challenge for the students especially regarding online study as most of them could not afford mobile phones or cable connection.

The teachers then selected three houses in three areas in the three villages where students shared their smart phones without any internet interruption to attend the online classes.

Using this concept, other students of poor backgrounds were greatly benefitted. The benefit of the system was later confirmed through internal assessment.
