

Case Study

Name of the School : Teliamura H/S School, Teliamura

Name of the School Head : Sri Mihir Lal Debnath

The newly joined H/S of Teliamura H/S School faced a very particular problem. The school shares its boundary wall with a local market devoid of lavatory. So the people of the market answer their natural calls inside this co-ed school, thus causing foul odour and sight pollution.

The issue was taken up with the teachers ,SMC, municipality and local MLA. The municipality sanctioned funds to construct a lavatory in the market, but the shop owners and the localities did not spare land for the purpose, thus the project failed. Personal efforts by the local businessman yielded adverse results.

Then in a final effort H/M along with teacher and student representatives, SMC and all the members of the market in a meeting formed a committee inducting members from all works of life and was conferred the responsibility to address the issue. With promising result at first the problem lingers on in wait and want of a solution.
